

APPLE II - MACINTOSH

KansasFest XX

20TH ANNIVERSARY

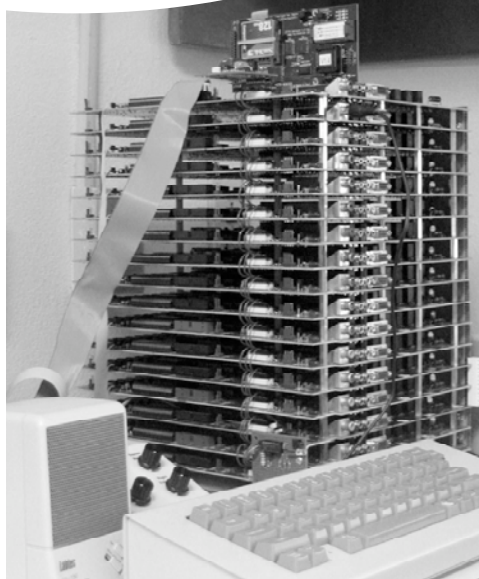

JULY 21-26, 2009

ROCKHURST UNIVERSITY
KANSAS CITY, MISSOURI

KansasFest is the world's only annual convention dedicated to the Apple II, the computer that revolutionized the personal computing industry. Hobbyists, retrocomputing enthusiasts, and diehard aficionados gather from all corners of the world to build, buy, sell, swap, code, and crack. If you're interested in the annual HackFest programming competition, taking a soldering class, or watching *WarGames*, there is no better company to do it with than at KansasFest, whether you're a newcomer or a veteran.

Come celebrate the twentieth annual conference dedicated to the Apple II computer, featuring a keynote speech by Jason Scott, director of *BBS: The Documentary* and *Get Lamp*. The Apple II has lasted for more than 30 years, and the friendships and memories made at KansasFest will last even longer.
