| 2000-2100 | CH   | **Juiced.GS Reception - "Pizza for the Masses"**  
- sponsored by Juiced.GS,  
The last remaining Apple II journal in print, and the Pizza Gnomes of Kansas City |
| 2100-2230 | CH   | **Bite The Bag - a time-honored KFest classic**  
- Geoff Weiss  
How low can you go? You don't have to be Bilbo Baggins to play this game. This is something that you can really sink your teeth in. Pick up a paper bag with only one limb on the ground. The bag gets shorter and shorter in every round. Who will be crowned champion?  
Who will sing the soggy paper bag blues? |
| 2300-?   |      | Late Night Run to Steak and Shake Run, Jack in the Box, etc.  
- Why Sleep? May occur on this night or any other. |

| 0900-0930 | CH   | **Session - Tour of Apple II built in Minecraft**  
- Steven Weyhrich  
A tour of a scale model of an Apple II Plus, built in the game Minecraft. |
| 0945-1030 | CH   | **Session - LOGO: History and Programming**  
- Peter Neubauer  
The LOGO programming language, best known for “turtle graphics,” was popular on the Apple II, especially in classrooms. LOGO is more than a child’s game. It's a sophisticated programming language and a serious educational tool for teaching mathematics backed by decades of research on learning theory. Join me to discuss the history of LOGO and for a tutorial introduction to the language. |

For the latest revision, this schedule is available online at [http://www.kansasfest.org/calendar/](http://www.kansasfest.org/calendar/)  
July 19th - 24th, 2011 - Rockhurst University - Kansas City, MO.
Thursday, July 21 (Cont.)

1045-1145  
**CH**  
Session - Escape from the Homebrew Computer Club  
- David Schmenk

Escape from the Homebrew Computer Club is a modern(ish) raycasted 2 1/2 D game for the Apple II. I will describe how I came up with the concept, the technology designed in it, and how to play it.

1200-1300  
**CF**  
Lunch at Rockhurst

1315-1330  
**CH**  
*Juiced.GS* staff photo

Anyone who has contributed to *Juiced.GS* since our last staff photo is invited to gather for a group picture.

1345-1430  
**CH**  
Session - Golden Age of Apple II panel  
- Jason Scott (moderator), Bob Bishop, Steven Weyhrich, Geoff Weiss

The Apple II was in production from 1977 to 1993. From early interest to broad adoption to being over shadowed by the Mac, followed by cancellation, diehard support, and retrocomputing revitalization, the machine has survived many eras and purposes. What was the golden age of the Apple II? What constituted its heyday, and how long did it last -- assuming it's already over, or has even happened? Jason Scott will moderate this panel consisting of Bob Bishop (Apple Computer Inc.), Steve Weyhrich (Apple II History), and Geoff Weiss (*Juiced.GS*).

1445-1530  
**CH**  
Session - Using disk images on the Apple IIgs  
- Geoff Weiss

Over the past few years, there have been developments which allow greater support of disk images on the IIgs. There will be a demonstration of the latest technology with such products as MountIt by Brutal Deluxe and the SmartportVHD by Cédric Peltier.

1545-1645  
**CH**  
Session - Vintage Apple Advertisements  
- Mike Maginnis

An open-for-discussion look at early Apple television advertisements, including Apple II and III, Macintosh and Newton.

1700-1800  
**CF**  
Dinner at Rockhurst

1830-2100  
**CH**  
Workshop - A2MP3 Workshop

Build Vince Briel’s newest kit, an Apple II card that can play MP3 files loaded via a USB memory stick. Advanced registration and fee was required for this workshop. All are welcome to watch.

1830-2100  
**CH**  
Check out other’s hardware, software and computers.  
Get help with yours, explore Internet, etc.

2130  
**CH**  
Ryan Suenaga Memorial Krispy Kreme Night

Come enjoy some warm donuts and cold milk, as Ryan would’ve wanted. A donation jar will be available, with 100% of the proceeds going toward his scholarship fund.

2200  
**CH**  
KFest Planning Committee Meeting

2300-?  
Late Night Run to Steak and Shake Run, Jack in the Box, etc.  
- Why Sleep? May occur on this night or any other.

For the latest revision, this schedule is available online at [http://www.kansasfest.org/calendar/](http://www.kansasfest.org/calendar/)  
July 19th - 24th, 2011 - Rockhurst University - Kansas City, MO.
0730-0830 CF Breakfast at Rockhurst

0845-0915 CH Session - Tokyo Video Chat
- Live via Skype

We’ll patch in to Bill Martens, Jim Maricondo and Philip Lord in Tokorozawa, Japan for their annual Apple II hack night. Bill runs the C.A.L.L. Apple and Virtual Apple web sites. Jim created the Golden Orchard disc compilation for the Apple IIGs. Philip is into Apple II Japanese program cassettes.

0930-1030 CH Session - Apple IIGs System Timing and the FPI
- Daniel Kruszyna

The Apple IIGs has a split personality. Most of the machine runs at a ~1MHz clock rate, keeping compatibility with earlier Apple IIs. Some components, however, can be decoupled and run at a faster rate. The FPI, or Fast Processor Interface, is the chip responsible for coordinating the interactions between these personalities. This session will include a high level overview of the FPI’s responsibilities, along with a detailed look at some particular cases, using signal measurements obtained from a real Apple IIGs.

1045-1145 CH Session - Hidden Gems of the Apple IIGs Toolbox
- Eric Shepherd

The Apple IIGs Toolbox is big. Really big. It does a lot of stuff. You may know about a lot of it, but there’s stuff in there that’s not obvious. Let’s take a look together at some of the interesting bits you may not have noticed.

1200-1300 CF Lunch at Rockhurst

1315-1415 CH Session - Networking your Mac or PC to your Apple II
- Ivan Drucker

Serve files to your Apple II the Cheap and Easy Way! If you have an enhanced Apple IIe or an Apple IIGs, then you have a computer that can access files shared from a current-day Mac, Windows, or Linux computer, and even boot ProDOS or GS/OS from the network instead of a disk. This session will show you the plan to get your II on the LAN.

1430-1500 CH Session - Is that a IIGs in your pocket or are you happy to see me?
- Geoff Weiss

The Free Tools Association (FTA) released ActiveGS, a free IIGs emulator for IOS devices now available in the iTunes App Store. 2011 is the year when the Apple IIGs has gone mobile and this is a chance to see it in action.

1515-1545 CH Session - Turtle Robots
- Peter Neubauer

The growth of the personal computer made computer-controlled robots popular and accessible to hobbyists. “Turtles” are a style of small, mobile robot resembling cybernetic animals. Join me for a photo tour and comparison of several turtle robots contemporary with the Apple II.
Friday, July 22 (Cont.)

1600-1700  CH  Session - A Technical Look at the Apple III
            - Mike Maginnis
            A more technical look at the system (SOS, Business BASIC, etc) and add-ons you can get today
            (Microsoft Softcard III, Titan Accelerator, etc.).

1715-1900  MH  Dinner Banquet
            MH  Black Tie contest, Door contest, contest contest
            - Ken "MC for Life" Gagne

1900-1915  MH  KFest Group Photo
            Stay in your formalwear after the banquet for the annual KansasFest group photo. Ahh, the memories!

2000  KC  Night on the town? Trip to Apple Store?
           Help or get help, check out Internet

2300-?  Late Night Run to Steak and Shake Run, Jack in the Box, etc.
            - Why Sleep? May occur on this night or any other.

Saturday, July 23

0730-0830  CF  Breakfast at Rockhurst

0845-0945  CH  Sean’s Garage at KFest Redux via the Magical Mystery Bus
            - Sean Fahey
            What treasures does Sean have in his garage? Well, we don’t even have to go find out, because he is
            bringing them to us, via James Littlejohn’s big green bus, aka “the late night Denny’s express”. Sean
            has a huge Apple II collection, and when he decides to clean some off the top, we all benefit.

1000-1030  CH  Session - Product Demo
            - Eric Shepherd
            What might this be? Be there to find out, as Sheppy removes the veil.

1045-1050  CH  Announcement - Juiced.GS

1050-1135  CH  Session - Behind the scenes at Open Apple
            - Mike Maginnis and Ken Gagne
            Open Apple, the Apple II community’s only co-hosted podcast, is the product of endless hours slaving
            over a mixing board and audio editing software. Watch and learn what goes into recording an episode
            of the show. What would an episode sound like without this extensive post-production process? Come
            hear the bloopers that should’ve been left on the cutting room floor.
